

I ask for the FCC to reject the NAB's petition 04-160. I have benefited from using XM radio in many ways. When I am traveling long distance, I have such a wide variety of music to choose from, that there is a guarantee I can find always find something to listen to that will help me stay awake the whole time! Also, I benefit from staying tuned with its news and weather reports it provides. I am constantly informed of all whereabouts' events, which helps me since I have friends and family located all over the United States. Please accept this proposal and reject this petition, so that I and other XM radio listeners may continue to benefit from this program, that we choose, as Americans to pay for and listen to. Thank you for your time and consideration!
Cordially yours,

Janet Michelle Baxter
